

CHMER Machinery Intelligence Know-how-CHMER Taiwan Brand Earns Global Recognition

■Wu Ching-chang

CHMER EDM is the top brand in Taiwan EDM industry and is internationally renowned for its innovative capabilities and precision performance. In 2019, the company exhibited high-precision wire-cutting EDM, aerospace-specific drilling EDM, and intelligence high-speed milling machines at the EMO. These products created an intelligent mechanical integration solution. CHMER EDM uses two brand names CHMER and AMS to promote "Made In Taiwan" products onto the global market and gained exposure and recognition.

Chen-hung Wang, President of CHMER EDM said: "RV853L Intelligent Linear Motor Drive Wire Cut EDM" that was exhibited at the 2019 EMO is not only well-known for its high precision capability, but also focuses on various intelligent functions that improves the user operation and increases the convenience of management for the customers. RV853L has won the 2017 Taiwan Excellence Gold Award, the First Prize for Best Product of the National Brand Yushan Award in 2018, and the Excellence Award in the Tool Machine Innovation Design Competition in the 2019 TIMTOS

Exhibition. This machine received the triple crown and is well deserving of its name.

Chen-hung Wang said that the RV853L Intelligent Linear Motor Drive Wire Cut EDM is committed to improving the processing efficiency and precision performance of large-scale molds, and actively meets the precision and intelligent processing needs of large-size molds as well as engineering parts in the automotive, aerospace, and home appliance industries. In addition to having an eye-catching appearance, more attention is paid to increasing processing efficiency and achieving professional technical breakthroughs to successfully obtain many patents such as the high-efficiency energy-saving water circulation system and the automatic liquid level control. The product also emphasizes various intelligent functions to make both user operation and management simpler, and this has been recognized by the customer.
